

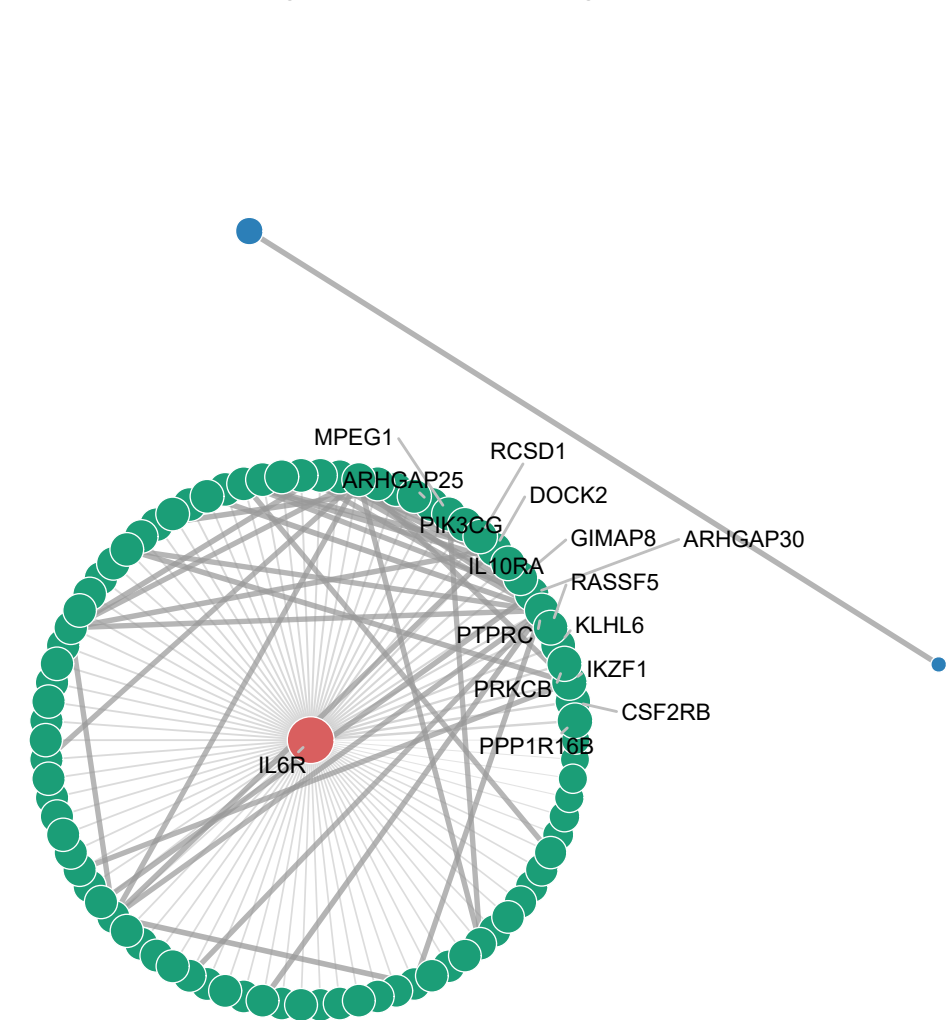

Figure 7. IL6R-associated support-layer network, enrichment and drug-target evidence

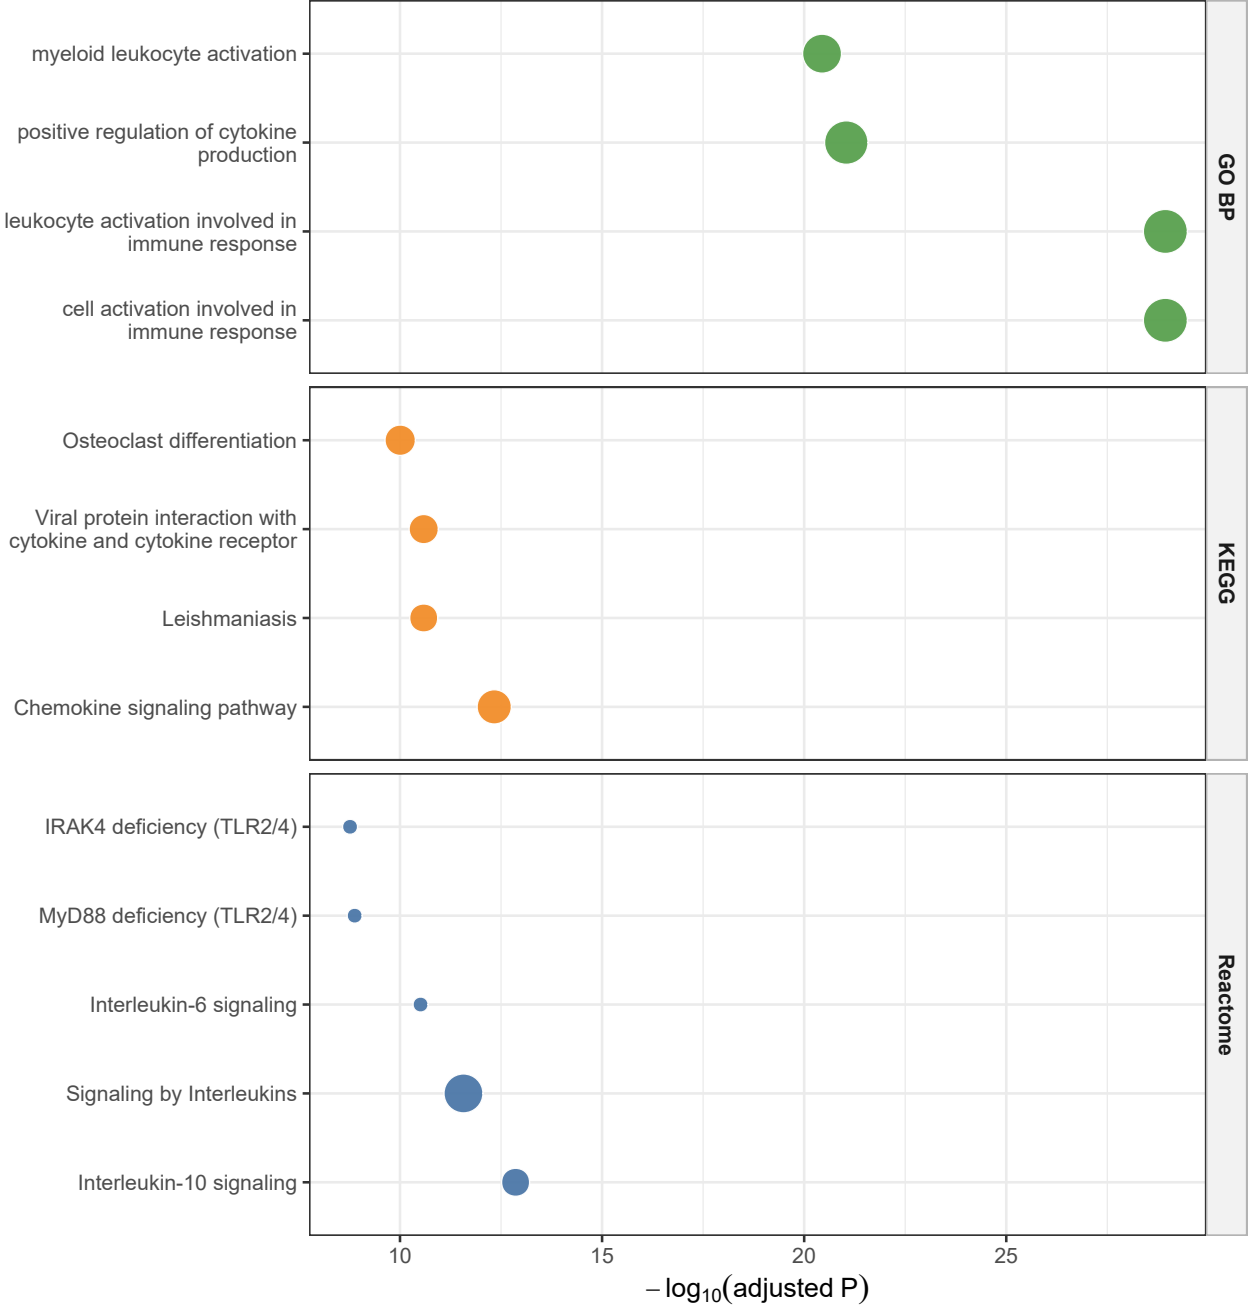

Label-safe v39.3 redraw from fixed traceability tables; IL6R-connected edges are retained rather than inferred

A. IL6R-centered support network

86 real IL6R-connected edges retained; top support edges added for context

B. Immune / inflammatory pathway support

C. Candidate drug-target support

Evidence-support candidates only; not interpreted as CRC-approved therapy
